This Surfing notebook / Journal makes an excellent gift for any occasion . Lined - Size: 6 x 9" - Notebook - Journal - Planner - Dairy - 110 Pages - Classic White Lined Paper - For Writing, Sketching, Journals and Hand Lettering "Responding to the linguistic and cultural diversity of the U.S. K-12 student population and an increasing emphasis on STEM, this book offers a model for professional development that engages teachers in transformative action research projects and explicitly links literacy to mathematics and science curriculum through sociocultural principles. Providing detailed and meaningful demonstrations of participatory action research in the classroom, Razfar and Troiano present an effective, systemic approach that helps preservice teachers support students' funds of knowledge. By featuring teacher and researcher narratives, this book centers teacher expertise and offers a more holistic and humanistic understanding of authentic and empathetic teaching. Focusing on integrating instructional knowledge from ESL, bilingual, and STEM education, the range of cases and examples will allow readers to implement action research projects in their own classrooms. Chapters include discussion questions and additional resources for students, researchers, and educators"-- Known for its risk analysis approach, Auditing Concepts and Applications emphasizes auditor identification of risk factors and allocation of audit resources to high risk areas. This approach greatly increases the probability of detecting misstatements caused by errors and irregularities. This text is intended for auditing courses at two- and four-year schools, but may also be used in auditing courses at the graduate level. Provides advice to designers, manufacturers, installers, users and others. Contents: Compressor plant; Air receivers; Coolers; Air dryers; Installation of compressors; Main line systems; Portable pneumatic equipment; Pneumatic powered machinery; Actuators; Interlocking methods of circuit design; Inspection and maintenance; Training. Esta obra trata sobre la ecología del águila Imperial Ibérica. Contiene información detallada y actualizada de la especie, la mayor parte de la cual es el resultado del trabajo científico realizado por Miguel Ferrer durante los últimos 11 años. Ferrer es un investigador de la Estación Biológica de Doñana, institución que pertenece al Consejo Superior de Investigación Científica (CSIC). This book can be used as a textbook for a real-time DSP laboratory course using the TMS320C6x DSP. The objective of this book is twofold: to provide DSP system designers with the knowledge needed to select an appropriate data converter for a specific DSP system of interest, and to provide the know-how for the implementation and optimization of computationally intensive signal-processing algorithms on the family of TMS320C6x DSP processors. It is written for those who are already familiar with DSP concepts and are interested in designing DSP systems based on TI data converters and TI C6x DSP products. The Barkley Deficits in Executive Functioning Scale (BDEFS) is an empirically based tool for evaluating dimensions of adult executive functioning in daily life. Evidence indicates that the BDEFS is far more predictive of impairments in major life activities than more time-consuming and costly traditional EF tests. The BDEFS offers an ecologically valid snapshot of the capacities involved in time management, organization and problem solving, self-restraint, self-motivation, and self-regulation of emotions. It comprises both self- and other-reports in a long form (15-20 minutes) and a short form (4-5 minutes). Special features include an adult ADHD risk index in the long form. Complete instructions for scoring and interpreting the scale are provided. See also the Barkley Deficits in Executive Functioning Scale--Children and Adolescents (BDEFS-CA) and Barkley's authoritative book on EF development and deficits, Executive Functions. Also available: Barkley Adult ADHD Rating Scale--IV (BAARS-IV) and Barkley Functional Impairment Scale (BFIS for Adults). Includes Permission to Photocopy Enhancing the convenience and value of the BDEFS, the limited photocopy license allows purchasers to reproduce the forms and score sheets and yields considerable cost savings over other available scales. The large format and sturdy wire binding facilitate photocopying. The three-volume set LNCS 9900, 9901, and 9902 constitutes the refereed proceedings of the 19th International Conference on Medical Image Computing and Computer-Assisted Intervention, MICCAI 2016, held in Athens, Greece, in October 2016. Based on rigorous peer reviews, the program committee carefully selected 228 revised regular papers from 756 submissions for presentation in three volumes. The papers have been organized in the following topical sections: Part I: brain analysis, brain analysis - connectivity; brain analysis - cortical morphology; Alzheimer disease; surgical guidance and tracking; computer aided interventions; ultrasound image analysis; cancer image analysis; Part II: machine learning and feature selection; deep learning in medical imaging; applications of machine learning; segmentation; cell image analysis; Part III: registration and deformation estimation; shape modeling; cardiac and vascular image analysis; image reconstruction; and MR image analysis. STEEL DESIGN

covers the fundamentals of structural steel design with an emphasis on the design of members and their connections, rather than the integrated design of buildings. The book is designed so that instructors can easily teach LRFD, ASD, or both, time-permitting. The application of fundamental principles is encouraged for design procedures as well as for practical design, but a theoretical approach is also provided to enhance student development. While the book is intended for junior-and senior-level engineering students, some of the later chapters can be used in graduate courses and practicing engineers will find this text to be an essential reference tool for reviewing current practices. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. The series Topics in Current Chemistry presents critical reviews of the present and future trends in modern chemical research. The scope of coverage is all areas of chemical science including the interfaces with related disciplines such as biology, medicine and materials science. The goal of each thematic volume is to give the non-specialist reader, whether in academia or industry, a comprehensive insight into an area where new research is emerging which is of interest to a larger scientific audience. Each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole. The most significant developments of the last 5 to 10 years are presented using selected examples to illustrate the principles discussed. The coverage is not intended to be an exhaustive summary of the field or include large quantities of data, but should rather be conceptual, concentrating on the methodological thinking that will allow the non-specialist reader to understand the information presented. Contributions also offer an outlook on potential future developments in the field. Review articles for the individual volumes are invited by the volume editors. Readership: research chemists at universities or in industry, graduate students. Focused technical guidance from System Center experts Part of a series of specialized guidance on System Center--this book provides a single end-to-end resource on Microsoft's software-defined datacenter solution built upon Windows Server 2012 R2 Hyper-V and System Center 2012 R2 Virtual Machine Manager. The book walks you through a proof of concept (POC) deployment of a software-defined compute, storage, and networking infrastructure, starting from racking bare-metal servers through to the streamlined deployment of virtual machines. Manufacturing is the basic industrial activity generating real value. Cutting and abrasive technologies are the backbone of precision production in machine, automotive and aircraft building as well as of production of consumer goods. We present the knowledge of modern manufacturing in these technologies on the basis of scientific research. The theory of cutting and abrasive processes and the knowledge about their application in industrial practice are a prerequisite for the studies of manufacturing science and an important part of the curriculum of the master study in German mechanical engineering. The basis of this book is our lecture "Basics of cutting and abrasive processes" (4 semester hours/3 credit hours) at the Leibniz University Hannover, which we offer to the diploma and master students specializing in manufacturing science. Presents the life of the soldier who committed a massive national security breach by releasing thousands of classified documents to WikiLeaks, exploring the influence of his political views and gender identity issues on his actions. These Regulations are published by the IATA Dangerous Goods Board, in consultation with the International Civil Aviation Organization (ICAO), and they constitute a manual of industry carrier regulations to be followed by IATA Member airlines. This edition is based on the requirements of Annex 18 to the Convention on International Civil Aviation and the 2007-08 edition of the associated Technical Instructions for the Safe Transport of Dangerous Goods by Air. These Regulations set out procedures for the shipper and the operator by which articles and substances with hazardous properties can be safely transported by air on all commercial air transport. Sections deal with: applicability, limitations, classification, identification, packing, packaging specifications and performance tests, marking and labelling, documentation, handling, and radioactive material. This is the 48th edition of this title and comes into effect on 1 January 2007, replacing the 47th edition (2006, ISBN 9291955809). Turbomachinery presents the theory and design of turbomachines with step-by-step procedures and worked-out examples. This comprehensive reference emphasizes fundamental principles and construction guidelines for enclosed rotators and contains end-of-chapter problem and solution sets, design formulations, and equations for clear understanding of key aspects in machining function, selection, assembly, and construction. Offering a wide range of illustrative examples, the book evaluates the components of incompressible and compressible fluid flow machines and analyzes the kinematics and dynamics of turbomachines with valuable definitions, diagrams, and dimensionless parameters. A data warehouse is an integrated database primarily used in organizational decision making. Although the deployment of data warehouses is current practise in the modern information technology landscapes, the methodical schema design for such databases has only been studied cursorily." The years 1676 and 1774 marked two turning points in the social and legal treatment of madness in England. In 1676, London's Bethlehem Hospital expanded in grand new premises, and in 1774 the Madhouses Act attempted to limit confinement of the insane. This study explores almost a century of the English history of madness through the texts of five poets who were considered mentally troubled according to contemporary standards: James Carke, Anne Finch, William Collins, Christopher Smart and William Cowper were hospitalized, sequestered or exiled from society. Their works cope with representations of insanity, medical definitions or practices, imputed illness, and the judging eye of the 'sane other', shedding new light on the dis/continuities in the notion of madness of this period.
