Agricultural Statistics is published each year to meet the diverse need for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. Its tables of annual data cover a wide variety of facts in forms suited to most common use. Professionals in the following fields to include farmers, ranchers, soil conservationists, surveyors, agricultural economist consultants, livestock manufacturers, livestock feedlot operators, food distributors, animal scientists, food chemists, food brokers, farm and land appraisers, statistical professionals, economists, (and more) may have the greatest interest in this volume. Additionally, students pursuing coursework in food science and agribusiness coursework may have an interest in this reference for completing term papers and other assignments. In this volume, you will find foreign agricultural trade statistics that include Government as well as non-Government shipments of merchandise from the United States and Territories to foreign countries. They do not include U.S. shipments to the U.S. Armed Forces abroad for their own use or shipments between the States and U.S. Territories. The world summaries of production and trade of major farm products are prepared by the U.S. Department of Agriculture from reports of the U.S. Department of Commerce, official

statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attache and Foreign Service Officers, and the result of office research. Statistics presented in many of the tables represent actual counts of the items covered. Most of the statistics relating to foreign trade and to Government programs, such as numbers and amounts of loans made to farmers, and amounts of loans made by the Commodity Credit Corporation, etc., are data of this type. A large number of other tables, however, contain data that are estimates made by the Department of Agriculture. The estimates for crops, livestock, and poultry made by the U.S. Department of Agriculture are prepared mainly to give timely current State and national totals and averages. They are based on data obtained by sample surveys of farmers and of people who do business with farmers. The survey data are supplemented by information from the Censuses of Agriculture taken every five years and check data from various sources. Being estimates, they are subject to revision as more data become available from commercial or Government sources. Unless otherwise indicated, the totals for the United States shown in the various tables on area, production, numbers, price, value, supplies, and disposition are based on official Department estimates. They exclude States for which no official estimates are compiled. Extensive table data include statistics of the following: - Statistics of Grain and Feed - Cotton, Tobacco, Sugar Crops, and Honey - Oilseeds, Fats, and Oils - Vegetables and Melons - Hay, Seeds, and Minor Field Crops - Cattle, Hogs, and Sheep - Dairy and Poultry - Insurance, Credit & Cooperatives - Agricultural Conservation & Forestry - Consumption & Family Living - Fertilizers & Pesticides - Miscellaneous Agricultural Statistics such as Foreign Agricultural Trade Statistics including exports, fisheries and more. NOTE: This annual product is available as a standing order -- To sign up for a standing order on this volume --please call GPO Contact Center at 1-866-512-1800 and provide the ZASstanding Order Code for this publication.
