Arbitrability Jun 14 2021 It often seems today that no dispute is barred from resolution by arbitration. Even the fundamental question of whether a dispute falls under the exclusive jurisdiction of a judicial body may itself be arbitrable. Arbitrability is thus an elusive concept; yet a systematic study of it, as this book shows, yields innumerable guidelines and insights that are of substantial value to arbitral practice. Although the book takes the form of a collection of essays, it is designed as a comprehensive commentary on practical issues that emerge from the idea of arbitrability. Fifteen leading academics and practitioners from Europe and the United States each explore different facets of arbitrability always with a perspective open to international developments and comparative evaluation of standards. The presentation falls into two parts: in the first the focus is on the general features of arbitrability, its rationale and the laws applicable to it. In the second, arbitrability is specifically examined in the context of administrative, criminal, corporate, IP, financial, commercial, and criminal law This book has its origins in an International Conference on Arbitrability held at Athens in September 2005. Seven papers presented there are here reviewed and updated, and nine others are added. The subject of the book and arbitrability is one that is much talked about, but seldom if ever given the in-depth treatment presented here. Arbitrators and other practitioners in the field will welcome the way the analysis moves logically from theory to practice regarding every issue, and academics will recognize a definitive treatment of arbitrability as understood and applied in the settlement of disputes today.

Tractors Jan 02 2023 Steam, and then cumbersome motor, tractors existed in small numbers before 1914, after which the need to produce more foods using less horse and man power saw the origins of the machine we know today. Thanks to mass production, Ford brought the price down to suit average farmers, and in the 1920s to 1940s numerous rivals brought in such novelties as diesel engines, pneumatic tyres, hydraulic implement lifts and even cost-effective all-wheel drive and weather protection. After the Second World-War, a strong new indigenous tractor industry was led by Ferguson, David Brown, Nuffield and Ford. This book highlights these developments and goes on to show the dramatic improvements of the 1950s and 1960s. *The Allis-Chalmers Story* Jun 26 2022 A Rich History With their signature orange paint, Allis-Chalmers machines have always been unmistakable. As symbols of reliability and innovation, they have long been a favorite of the working farmer and the farming equipment enthusiast. With the help of more than 1,500 photos and illustrations, accomplished author C.H. Wendel tells the tale of this great company in *The Allis-Chalmers Story*. This pictorial tour through history begins with the founding of the Gate Iron Works in 1842, and ends with the Deutz-Allis merger in 1985. Included are information and photos for all the equipment the company produced during that period, including equipment from Advance-Rumely, Monarch, and LaCrosse.

Invitation to a War Sep 05 2020 Invitation to a War is the eye-witness account of Larry Drew's experience of the war in the Pacific, first at Pearl Harbor and then on Guadalcanal. While a student at Ohio State University, he spent time in the ROTC program, learning the theory and methods of field artillery. Taking a year off to earn money to continue his education, he was literally invited on an "all-expense paid" cruise to Hawaii by the Navy Labor Board. It must have seemed like fate, for within a week of his arrival, Pearl Harbor was savagely attacked, right before his eyes. The story details the horror of the attack and its aftermath, and the courage and dedication of the survivors working to recover and rebuild, through the eyes of a young shipyard worker. After months of round-the-clock work and thinking the Japanese would attack again soon, Larry used the occasion of his first day off to join the US Army. He wanted to be carrying a rifle when they landed. The Japanese invasion of Hawaii didn't happen, largely due to the courage and resources of the US Navy and Army Air Corps at the battle of Midway. Larry, as part of the US Army's 25th Division, was called to relieve elements of the 1st and 2nd Marine Corp. Divisions in the offensive to take Guadalcanal from the Japanese. As a forward artillery spotter, he spent weeks behind enemy lines, calling in artillery strikes. His stories mix violent combat and tense missions with the camp activities between assignment and attacks. These events celebrate the character, courage, and at times even the indomitable

humor of American fighting men of World War II.

Classic Oliver Tractors Nov 27 2019 James Oliver sold his first "chilled" plow in 1870--"chilled" because

the cast iron was cooled quickly with water to harden the metal and strengthen the plow. And when Oliver Chilled Plow Works merged with the Hart-Parr Company in 1929, the might of capital, expertise, and engineering resources came together to create one of the most successful and revered small tractor manufacturers of all time. This book follows the Oliver tractor from its inception through its development over the years, until the last model rolled off the assembly line in 1976. A story of entrepreneurship and industry, of machinery and American know-how, this illustrated history captures the spirit of Oliver farm equipment as its tractors and crawlers, hay balers and threshers turned American farmland to gold. Throughout, brilliant color photographs and historical images bring the story of the Oliver tractor vividly and vibrantly to life.
