Magazine is the treasured photographic magazine that chronicled the 20th Century. It now lives on at LIFE.com, the largest, most amazing collection of professional photography on the internet. Users can browse, search and view photos of today's people and events. They have free access to share, print and post images for personal use. The soil; The grass; Turf formation; Turf nutrition. Turf maintenance and machinery; Turf management; Turf diseases and their control; Pests of turf; Turf weeds; Turf abroad. *Highly Commended in the Popular Medicine

category at the 2012 British Medical Association Book Awards* The simple sensation of touching someone's hand can have a powerful therapeutic effect. Hand massage is a positive and meaningful way of reaching out and providing comfort to those who are elderly, ill or nearing the end of life, and it can be particularly effective for people with dementia who may respond well to positive non-verbal interaction. This book offers inspiration for all caregivers looking for an alternative way to support and connect with a family member, friend or patient in their care. It teaches an easy 30

minute hand massage sequence and offers clear instructions and detailed illustrations to guide the reader through each step. Combining light massage strokes with focused awareness, and paying close attention to points on energy pathways, this book introduces a structured way of sharing touch that is grounded in Western and Eastern massage traditions. Gentle touch therapy is ideal for healthcare professionals and family members alike, and has been shown to have physical and emotional benefits for both the giver and the receiver. Popular Science

gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Before the Internet, Wal-Mart, and the shopping mall, there was Montgomery Ward. pt. 1. List of patentees.--pt. 2. Index to subjects of inventions. The site of political demonstrations, sporting events, and barbecues, and the object of loving, if not obsessive, care and attention, the lawn is also symbolically tied to our notions of community and

civic responsibility, serving in the process as one of the foundations of democracy. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Tea gowns, bleached damask, and yards of flannel and pillow-case lace, stereoscopes, books of gospel hymns and ballroom gems, the New Improved Singer Sewing Machine, side saddles, anti-freezing well pumps, Windsor

Stoves, milk skimmers, straight-edged razors, high-button shoes, woven cane carpet beaters, spittoons, the Studebaker Road Cart, commodes and washstands, the "Fire Fly" single wheel hoe, cultivator, and plow combined, flat irons, and ice cream freezers. What man, woman, or child of the 1890s could resist these offerings of the Montgomery Ward catalogue, the one book that was read avidly, year after year, by millions of Americans on farms and in small towns across the nation? The Montgomery Ward catalogue provides one of the few irrefutably accurate pictures of

what life was "really like" in the gay nineties, for it described and illustrated almost anything that anybody could possibly need or want in the way of "store-bought" goods. In fact, in that pre-department store era, it was usually the only source for such goods. Imagine if Montgomery Ward had issued an illustrated catalogue in the days of Louis XIV, or Elizabeth I, or Charlemagne: what insights would we have into the daily life of the "common folk," the farmers and shopkeeper, housewives and schoolchildren . . . what sources of information for historians and

scholars, collectors and dealers, what models for artists and designers. In 1895, Montgomery Ward was the oldest, largest, and most representative mail-order house in the country. The brainchild of a former traveling salesman, it issued its first catalogue in 1872, a one-page listing of items. By 1895, the catalogue, reprinted here, had grown to 624 pages and listed some 25,000 items,

almost all of them illustrated with live drawings. Montgomery Ward was by then a multi-million dollar business that profoundly affected the American economy; and since it reached the most isolated farms and backwoods cabins, its effect on American culture was almost as great. Now once again available, it is our truest, most unbiased record of the spirit of the 1890s. An

introduction on the history of the Montgomery Ward Company and its catalogue has been prepared especially for this edition by Boris Emmet, Ph.D. (Johns Hopkins), a foremost expert on retail merchandising. His monumental work Catalogues and Counters has long been recognized as a landmark in the study of American economic history.
