THE YEAR IS 1967. In England, and around the world, rock music is exploding—the Beatles have gone psychedelic, the Stones are singing "Ruby Tuesday," and the summer of love is approaching. For Jack Flynn, a newly minted young solicitor at a conservative firm, the rock world is of little interest—until he is asked to handle the legal affairs of Emerson Cutler, the seductive front man for an up-and-coming group of British boys with a sound that could take them all the way. Thus begins Jack Flynn's career with the Ravons, a forty-year journey through London in the sixties, Los Angeles in the seventies, New York in the eighties, into Eastern Europe, Africa, and across America, as Flynn tries to manage his clients through the highs of stardom, the has-

been doldrums, sellouts, reunions, drug busts, bad marriages, good affairs, and all the temptations, triumphs, and vanities that complicate the businesses of music and friendship. Spanning the decades and their shifting ideologies, from the wild abandon of the sixties to the cold realities of the twenty-first century, *Evening's Empire* is filled with surprising, sharply funny, and perceptive riffs on fame, culture, and world events. A firsthand observer and remarkable storyteller, author Bill Flanagan has created an epic of rock-and-roll history that is also the life story of a generation. Theories of international relations, assumed to be universally applicable, have failed to explain the creation of states in Africa. There, the interaction of power and space is dramatically different from what occurred in Europe. In *States and Power in Africa*, Jeffrey Herbst places the African state-building process in a truly comparative perspective. Herbst's bold contention—that the conditions now facing African state-builders existed long before European penetration of the continent—is sure to provoke controversy, for it runs counter to the prevailing assumption that colonialism changed everything. This revised edition includes a new preface in which the author links the enormous changes that have taken place in Africa over the past fifteen years to long-term state consolidation. The final chapter on policy prescriptions has also been revised to reflect the evolution of African and international responses to state failure.

"Belcher's volume contains a much needed and extremely well-integrated overview and discussion of a vast inter-related West African culture complex that deserves and requires the kind of original, insightful treatment it receives here." —David Conrad *Epic Traditions of Africa* crosses boundaries of language, distance, and time to gather material from diverse African oral epic traditions. Stephen Belcher explores the rich past and poetic force of African epics and places them in historical and social, as well as artistic contexts. Colorful narratives from Central and West African traditions are illuminated along with texts that are more widely available to Western readers—the Mande Sunjata and the Bamana Segou. Belcher also takes up questions about European influences on African epic poetry and the possibility of mutual influence through out the genre. This lively and informative volume will inspire an appreciation for the distinctive qualities of this uniquely African form of verbal art. There has long been a need for a new textbook on West Africa's history. In *Themes in West Africa's History*, editor Emmanuel Kwaku Akyeampong

and his contributors meet this need, examining key themes in West Africa's prehistory to the present through the lenses of their different disciplines. The contents of the book comprise an introduction and thirteen chapters divided into three parts. Each chapter provides an overview of existing literature on major topics, as well as a short list of recommended reading, and breaks new ground through the incorporation of original research. The first part of the book examines paths to a West African past, including perspectives from archaeology, ecology and culture, linguistics, and oral traditions. Part two probes environment, society, and agency and historical change through essays on the slave trade, social inequality, religious interaction, poverty, disease, and urbanization. Part three sheds light on contemporary West Africa in exploring how economic and political developments have shaped religious expression and identity in significant ways. Themes in West Africa's History represents a range of intellectual views and interpretations from leading scholars on West Africa's history. It will appeal to college undergraduates, graduate students, and scholars in the way it draws on different disciplines and expertise to bring together key themes in West Africa's history, from prehistory to the present. Covering the entire continent from Morocco, Libya, and Egypt in the north to the Cape of Good Hope in the south, and the surrounding islands from Cape Verde in the west to Madagascar, Mauritius, and Seychelles in the east, the Encyclopedia of African History is a new A-Z reference resource on the history of the entire African continent. With entries ranging from the earliest evolution of human beings in Africa to the beginning of the twenty-first century, this comprehensive three volume Encyclopedia is the first reference of this scale and scope. Also includes 99 maps. This groundbreaking volume examines the extraordinary artistic and cultural traditions of the African region known as the western Sahel, a vast area on the southern edge of the Sahara desert that includes present-day Senegal, Mauritania, Mali, and Niger. This is the first book to present a comprehensive overview of the diverse cultural achievements and traditions of the region, spanning more than 1,300 years from the pre Islamic period through the nineteenth century. It features some of the earliest extant art from sub Saharan Africa as well as such iconic works as sculptures by the Dogon and Bamana peoples of Mali. Essays by leading international scholars discuss the art, architecture, archaeology, literature, philosophy, religion, and history

of the Sahel, exploring the unique cultural landscape in which these ancient communities flourished. Richly illustrated and brilliantly argued, Sahel brings to life the enduring forms of expression created by the peoples who lived in this diverse crossroads of the world. In his book *Colonial Mentality and the Destiny of Africa*, Godfrey Mwakikagile examines the negative impact of colonial mentality on Africa's well-being as a continental crisis and how it impedes Africa's progress and the quest for an African renaissance. This work expands the scope of Morrison's project to examine the ways and means of memory in the preservation of belief systems passed down from the earliest civilizations (both the Classical Greek and the Ancient Egyptian) as a challenge to the sterility of modernity. Moreover, this research explores the author's specific use of Foucauldian theory as a vehicle for her narrative, which reclaims the very origins of civilization's primal concerns with life, procreation and regeneration, springing from the very Heart of Africa. Despite the weight of "white" authority and the disparaging of "blackness," *Beloved's* multiple "ghosts" conjure up a legacy so potent that no authoritarian discourse has been able to entirely erase it, a legacy that still speaks to us from a heritage we no longer acknowledge yet that nevertheless remains, and sustains us. In our age of globalization and multiculturalism, it has never been more important for Americans to understand and appreciate foreign cultures and how people live, love, and learn in areas of the world unfamiliar to most U.S. students and the general public. The four volumes in our cultural sociology reference encyclopedia take a step forward in this endeavor by presenting concise information on those regions likely to be most "foreign" to U.S. students: the Middle East, Asia, and Africa. The intent is to convey what daily life is like for people in these selected regions. It is hoped entries within these volumes will aid readers in efforts to understand the importance of cultural sociology, to appreciate the effects of cultural forces around the world, and to learn the history of countries and cultures within these important regions. This study argues that material compensation and caste status are essential to the signifying practice of Malian jeliw ("griots") and its continuing relevance. As Mande society's hereditary "masters of the word", jeliw entrance their listeners with accounts of ancestors' heroic deeds, sometimes in the context of epic recitations and sometimes in popular song. These genealogical narratives function as praise in a society that understands descent as an essential

constituent of personality. Indexing an imperial social order with inherited bonds of obligation between patron and client, this praise reproduces the status of the jeliw. Gifts of cash and goods to the jeliw on the occasions of these performances concretize the traditional obligations of nobles and, thus, realize the nobility of the givers. Material compensation makes jeli flattery true in ways it would not otherwise be. These gifts defy both the Maussian discussion of gifting and the Marxian analysis of commodity exchange. The jeliw's semiosis is performative in the sense that they help to create the historical imaginary to which their utterances refer. Thus, performances of jeli praise may help Malians to negotiate the marginalizing effects of globalization. Focusing on individual political thinkers and beginning with indigenous African political thought, the book successively examines African nationalism, African socialism, populism and Marxism, Africanism and pan-Africanism, concluding with contemporary perspectives on democracy, development and the African state. "... the contributors to Status and Identity in West Africa have swept away the dust that has obscured the study of the societies of western Sudan and have made it possible to pursue the salutary work of decolonizing the history and sociology of these regions." -- American Ethnologist "This discussion is among the most significant contributions that African studies can make to the contemporary global dialogue on multicultural issues." -- Choice "It is 'must' reading for anyone who works in African literature today." -- Research in African Literatures "...an indispensable guide to understanding the producers of art in the Mande world, including the art of the spoken word. The writing and arguments are clear and jargon-free...it will provide a rich harvest of detailed original research..." -- African Arts "[This] book... is the most impressive effort to look at these groups in comparative perspective. The essays fit together nicely to challenge notions that came out of colonial scholarship." -- Journal of Interdisciplinary History "... the volume makes a significant contribution to the social history and ongoing processes of cultural pluralism in West Africa." -- Journal of Religion in Africa

The nyamakalaw -- blacksmiths, potters, leather-workers, bards, and other artists and specialists among the Mande-speaking peoples of West Africa -- play powerful roles in Mande society. This book presents the first full portrait of one of Africa's most powerful and least understood social groups. An exploration of the powerful Bamana State, which emerged in 1712 and centred around

the Middle Niger. It shows how it was a solid commercial, military and agricultural society for centuries. The author also tells of the efforts of two alien powers to assert hegemony over the Bamana of Segou. This second volume of Gyllenbok's encyclopaedia of historical metrology comprises the first part of the compendium of measurement systems and currencies of all sovereign states of the modern World (A-I). Units of measurement are of vital importance in every civilization through history. Since the early ages, man has through necessity devised various measures to assist him in everyday life. They have enabled and continue to enable us to trade in commonly and equitably understood amounts, and to investigate, understand, and control the chemical, physical, and biological processes of the natural world. The encyclopaedia will be of use not only to historians of science and technology, but also to economic and social historians and should be in every major academic and national library as standard reference work on the topic.

Encyclopedia of the Peoples of Africa and the Middle East is a two-volume A-to-Z reference to the history and culture of the peoples of Africa and the Middle East. This work focuses on life under British colonial rule in Tanganyika and Southern Rhodesia. An African from Tanganyika, now Tanzania, shares his experiences. A British administrator who worked in colonial Tanganyika and in Southern Rhodesia also shares his. It is a work of shared memories although a generation apart – the British administrator being old enough to be a father to the African colonial subject who remembers not only the good times but also some of the injustices he and others suffered during that period. Both perspectives, complementing each other, shed some light on how life was in colonial Tanganyika for the indigenous people and for the British settlers and colonial rulers as well. It was a critical period in the history of Tanganyika and for the future of the country which came to be known as Tanzania after uniting with Zanzibar in 1964. It was also a critical period in the history of Southern Rhodesia which tragically descended into war only a few years later because of the injustices Africans suffered at the hands of their rulers: the white settlers who monopolised power. The work is also important in another respect. It is a primary source of information. The two individuals who have written about their experiences during those days were witnesses to history. They lived in those countries. They know what happened. And they have written about it for others to know how life was during some of the most critical years in the history of British colonial rule in

Africa. This is the first English translation of a traditional history of the eighteenth- and nineteenth-century Bamana kingdom of Segu, which flourished in an area that was once part of the Mali Empire and which far outlasted its neighbors in resistance to Islam. The story, which is one of Africa's great epic traditions, offers a view of daily life in Bamana Segu. Tayiru Banbera adds to this, providing invaluable information on such diverse topics as military strategy, culinary practices, taxation, law enforcement, and seduction. The Somono are an ethnic group specialized in fishing on the river Niger. Somono Bala is an epic story. This is the first ever translation of this narrative from the Maninka language into English. This fourth edition of this best-selling core history textbook offers a richly illustrated, single volume, narrative introduction to African history, from a hugely respected authority in the field. The market-leading range of illustrated material from prior editions is now further improved, featuring not only additional and redrawn maps and a refreshed selection of photographs, but the addition of full colour to make these even more instructive, evocative and attractive. Already hugely popular on introductory African History courses, the book has been widely praised for its engaging and readable style, and is unrivalled in scope, both geographically and chronologically - while many competitors limit themselves to certain regions or eras, Shillington chronicles the entire continent, from prehistory right up to the present day. For this new edition, both content and layout have been thoroughly refreshed and restructured to make this wealth of material easily navigable, and even more appealing to students unfamiliar with the subject. New to this Edition: - Now in full colour with fresh new design - Part structure and part intros added to help navigation - New and improved online resources include a new testbank, interactive timelines, lecturer slides, debates In African history, essay questions and further readings - Revised and updated in light of recent research This book supplies fundamental information about the diverse religious beliefs of Africa, explains central tenets of the African worldview, and overviews various forms of African spiritual practices and experiences. • Presents approximately 100 alphabetically arranged entries written by a team of expert contributors • Overviews the plurality of African religious cultures and identifies the distant origins of African American religious experiences today • Includes primary documents discussing African religious beliefs and practices This volume examines the complex

technique of wet earth construction, as practised in parts of West Africa. It includes a variety of structures, ranging from small huts to mosques, including the mosque at Dougoumba which dates from the 12th century. Engaging with a Legacy shows how Nehemia Levtzion shaped our understanding of Islam in Africa and influenced successive scholarly generations in their approach to Islamization, conversion and fundamentalism. The book illuminates his work, career and family life – including his own ‘life vision’ on the occasion of his 60th birthday. It speaks to his relationship with researchers at home and abroad as mentor, colleague and provocateur; in one section, several authors reflect on those dynamics in terms of personal and professional development. Levtzion’s contemporaries also speak of interactions with him (and his life-long companion, wife Tirza) in the 1950s and 1960s; we see in these writings the birth of West African historical studies. Levtzion’s arrival as Israeli graduate-student in Nkrumah’s Egyptian-leaning Ghana, and the debate over what ‘African Studies’ should mean in an environment that included the personal intervention of W.E.B. Du Bois, are stories told for the first time. Most poignant is the account of Levtzion’s commitment to building African Studies, complete with emphasis on Islam, in the heart of the Jewish state at The Hebrew University. His never-ending defence of the program reflected his determination to be both ‘engaged historian’ and ‘engaged Israeli’ – a legacy he chose for himself. Finally, an ‘Epilogue’ to the original publication shows how one aspect this legacy, Levtzion’s growing preoccupation with the ‘public sphere in Muslim societies’, has become even more relevant in ‘post-Arab Spring’ Africa and the Middle East. This book was published as a special issue of the Canadian Journal of African Studies. Most histories seek to understand modern Africa as a troubled outcome of nineteenth century European colonialism, but that is only a small part of the story. In this celebrated book, beautifully translated from the French edition, the history of Africa in the nineteenth century unfolds from the perspective of Africans themselves rather than the European powers. It was above all a time of tremendous internal change on the African continent. Great jihads of Muslim conquest and conversion swept over West Africa. In the interior, warlords competed to control the internal slave trade. In the east, the sultanate of Zanzibar extended its reach via coastal and interior trade routes. In the north, Egypt began to modernize while Algeria was colonized. In the south, a series of forced migrations

accelerated, spurred by the progression of white settlement. Through much of the century African societies assimilated and adapted to the changes generated by these diverse forces. In the end, the West's technological advantage prevailed and most of Africa fell under European control and lost its independence. Yet only by taking into account the rich complexity of this tumultuous past can we fully understand modern Africa from the colonial period to independence and the difficulties of today. A significant re-examination of the *Tārīkh al-fattāsh*, revealing it to be a crucial nineteenth-century source for history in West Africa. The collective inquiries in this volume address ethnicity in ancient Africa as social fact and political artifact along numerous dimensions. Is ethnicity a useful analytic? What can archaeology say about the kinds of deeper time questions which scholars have asked of identities in Africa? Eleven authors engage with contemporary anthropological, historical and archaeological perspectives to examine how ideas of self-understanding, belonging, and difference in Africa were made and unmade. They examine how these intersect with other salient domains of social experience: states, landscapes, discourses, memory, technology, politics, and power. The various chapters cover broad geographic and temporal ground, following an arc across Senegal, Mali, Nigeria, Cameroon, the Democratic Republic of Congo, Rwanda, and East Africa, spanning from prehistory to the colonial period. It seems incredible that heretofore there has not been an introductory anthology of African epics presented in English. Western literary culture has long emphasized the heritage of such well-known epics as the *Iliad*, the *Odyssey*, and *Aeneid*. But it is only recently that scholars have turned their attention toward capturing the rich oral tradition that is still alive in Africa. The twenty-five excerpts in this volume have been selected and introduced so as to offer English-speaking readers a broad sample of the extensive epic traditions in Africa. The general introduction and the background on each epic will enable readers to understand the context of each epic and will also provide leads for further inquiry. Internationally renowned academics look at memories of slavery in the Francophone world, reflecting upon contemporary commemorative practices that relate to the history of slavery and the slave trade, and questioning how they function in relationship to other, less memorialized histories of exploitation, such as indentured and forced labour. How imperial powers conquered the minds of many Africans to facilitate and

perpetuate imperial rule and domination. "Numerous titles focusing on particular beliefs in Africa exist, including Marcel Griaule's *Conversations with Ogotemmeli*, but this one presents an unparalleled exploration of a multitude of cultures and experiences. It is both a gateway to deeper exploration and a penetrating resource on its own. This is bound to become the definitive scholarly resource on African religions." — *Library Journal*, Starred Review "Overall, because of its singular focus, reliability, and scope, this encyclopedia will prove invaluable where there is considerable interest in Africa or in different religious traditions." — *Library Journal* As the first comprehensive work to assemble ideas, concepts, discourses, and extensive essays in this vital area, the *Encyclopedia of African Religion* explores such topics as deities and divinities, the nature of humanity, the end of life, the conquest of fear, and the quest for attainment of harmony with nature and other humans. Editors Molefi Kete Asante and Ama Mazama include nearly 500 entries that seek to rediscover the original beauty and majesty of African religion. Features · Offers the best representation to date of the African response to the sacred · Helps readers grasp the enormity of Africa's contribution to religious ideas by presenting richly textured concepts of spirituality, ritual, and initiation while simultaneously advancing new theological categories, cosmological narratives, and ways to conceptualize ethical behavior · Provides readers with new metaphors, figures of speech, modes of reasoning, etymologies, analogies, and cosmogonies · Reveals the complexity, texture, and rhythms of the African religious tradition to provide scholars with a baseline for future works The *Encyclopedia of African Religion* is intended for undergraduate and graduate students in fields such as Religion, Africana Studies, Sociology, and Philosophy. "A ... synthesis of African and African-American history that shows how slavery differed in different regions of the country, and how the Africans and their descendants influenced the culture, commerce, and laws of the early United States"-- *How Africa was conquered by the imperial powers. Warfare in Atlantic Africa, 1500-1800* investigates the impact of warfare on the history of Africa in the period of the slave trade and the founding of empires. It includes the discussion of: : \* the relationship between war and the slave trade \* the role of Europeans in promoting African wars and supplying African armies \* the influence of climatic and ecological factors on warfare patterns and dynamics \* the impact of social organization and military technology, including the

gunpowder revolution \* case studies of warfare in Sierra Leone, the Gold Coast, Benin and West Central Africa Based around the life of Mademba Sèye, an African born in the colonial town of Saint Louis du Sénégal in 1852, who transformed himself with the help of his French patrons from a telegraph clerk into an African king, this book examines Mademba's life and career to reveal how colonialism in French West Africa was articulated differently at different times and how Mademba survived these changes by periodically reinventing himself.

Investigating Mademba's alleged abuses of power and crimes that pitted French colonial indirect rule policy with its foundations in patronage and loyalty against its stated commitment to the rule of law and the civilizing mission, *Conflicts of Colonialism* sheds light on conflicts between different forms of colonialism and the deep ambiguities of the rule of law in colonial societies, which, despite serious challenges to Mademba's rule, allowed him to remain king until his death in 1918. Offers a historical, multidisciplinary perspective on African political systems and institutions, ranging from Antiquity (Egypt, Kush and Axum) to the present with particular focus on their destruction through successive exogenous processes including the Atlantic slave trade, imperialism, colonialism and neo-colonialism or globalization. Explores empires of medieval west Africa. To what extent can Islam be localized in an increasingly interconnected world? The contributions to this volume investigate different facets of Muslim lives in the context of increasingly dense transregional connections, highlighting how the circulation of ideas about 'Muslimness' contributed to the shaping of specific ideas about what constitutes Islam and its role in society and politics. Infrastructural changes have prompted the intensification of scholarly and trade networks, prompted the circulation of new literary genres or shaped stereotypical images of Muslims. This, in turn, had consequences in widely differing fields such as self-representation and governance of Muslims. The contributions in this volume explore this issue in geographical contexts ranging from South Asia to Europe and the US. Coming from the disciplines of history, anthropology, religious studies, literary studies and political science, the authors collectively demonstrate the need to combine a translocal perspective with very specific local and historical constellations. The book complicates conventional academic divisions and invites to think in historically specific translocal contexts. The fourth edition of the *Historical Dictionary of Mali*, through its

chronology, bibliography, introductory essay, and over 500 cross-referenced dictionary entries on important persons, places, events, and institutions and significant political, economic, social, and cultural aspects, provides an important reference on this African country.
